

## Introduction and Request to Partner

Dear Sir / Madam,

Let us introduce you to the Refill campaign.

Refill Ireland is a volunteer-led environmental project that allows the public to find their local businesses who have pledged to provide no quibble FREE tap water refills on request to people's own reusable water bottles perhaps after their coffee, meal, haircut, fix or local appointment.

The simple aim of the project is to reduce the blight of single use plastic drinking water bottle waste in our streets and waterways by providing an alternative for the public to stay healthy and hydrated while on the go in our towns and cities. It may be a service you already happily provide.

Public water fountains are a rare feature and we hope that joining the project will assist with footfall to your premises. It's a visible and practical way to demonstrate your commitment to the local and wider environment for which the public may well appreciate.

**Would you like to join the refill network?** There are no costs involved to your business, we just ask you to simply display a window sticker advertising the service, if possible.

To join, simply respond to the email address [info@refill.ie](mailto:info@refill.ie) with the following information:

- Business name, address and contact number.

We will add you to our interactive national Tap Map on [www.refill.ie](http://www.refill.ie), and also advertise your joining on social media channels.

For further information on the Refill Ireland project, and/or if you have further queries please don't hesitate to get in contact by phone, email or social media.

Kind Regards,

Barry O'Connor,

Project Co-ordinator, 087 0525449
